DESCRIPTORS: *Photographic emulsions, Photographic
chemicals, High speed photography, Processing.

In order to equalize the development in the depth of the
layer, as well as to increase the emulsion speed to the
same level as obtained with the emulsion developed
without support, alkali solutions were added to the
emulsion before the coating to increase the pH to
6.5-6.7. Uniformity of tracks in the depth of the
emulsion layer was entirely satisfactory. The emulsion
